REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The closest prior art of Sakata et al. (US 2004/0215224) in view of Shraga (US 6,022,366) will be discussed. Sakata in view of Shraga discloses a lancing device comprising a lancing mechanism having a lancet carriage, a lancet holder slidably connected the lancet carriage, a lancet attached to the lancet holder, and a floating probe ("7"; fig. 15) and pressure tip for engaging a target site and creating a target site bulge, wherein the floating probe is adapted to floatably rest upon the target tissue site bulge as the bulge is created by the pressure tip and configured to operatively interact with the lancet carriage to control a penetration depth of the lancet into the target site bulge.

However Sakata in view of Shraga fails to disclose a lock-stop assembly. Although various locking mechanisms on lancets are well known, none of the prior art discloses or fairly suggests the addition of a lock-stop assembly on a lancing probe with a floating probe wherein engagement of the floating probe with the lock-stop assembly prevents movement of the floating probe during penetration of the lancet into the target site bulge.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
